For Immediate Release

CO2 Solutions Announces Notice of Allowance for Danish Intellectual Property

Quebec City, Quebec, November 26, 2015 – CO₂ Solutions Inc. (TSX-V:CST), the leader in the field of enzyme-enabled carbon capture technology, today announced it has received a notice of allowance for Danish Utility Model (intellectual property rights) N° BA202400177 - SYSTEM FOR CO₂ CAPTURE USING PACKED REACTOR AND ABSORPTION MIXTURE WITH MICRO-PARTICLES INCLUDING BIOCATALYSTS - from the Danish Patent Office.

The utility model will add even more depth to CO₂ Solutions' extensive intellectual property portfolio, providing broad coverage for enzyme-accelerated processes for carbon capture. CO₂ Solutions believes this utility model could have significant value relative to one or more CO₂ capture projects currently underway in Denmark that the Corporation believes may be infringing on the CO₂ Solutions proprietary technology, including operations covered by this utility model.

The positive decision by the Danish Patent Office is all the more notable given that a leading European biotech company filed numerous documents and arguments against the pending CO₂ Solutions application. Obtaining the allowance despite significant opposition further illustrates the strength and value of CO₂ Solutions' intellectual property surrounding its innovative technologies. In addition, CO₂ Solutions has numerous other patents/utility model pending in Denmark and Europe.

"This is a clear validation of the robustness of our patent portfolio, the competence of our IP team, and the uniqueness of our technology" stated Evan Price, President and Chief Executive Officer of CO₂ Solutions. "With this utility model to be issued, we have added yet another element to our strong intellectual property portfolio, which we believe effectively covers the viable routes to commercialization of carbonic anhydrase enzyme-based systems for the capture of CO₂, presenting more barriers to entry in this space. Our competitors should have no doubt that we will defend our IP vigorously whenever and wherever necessary."

About CO₂ Solutions Inc.

CO₂ Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO₂ Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO₂ mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO₂ Solutions has built an extensive patent portfolio covering the use of carbonic anhydrase, or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents.
