CO₂ Solution to Present at Leading Carbon Capture Industry Conference

CO₂ Solution will outline value propositions of its technology for the efficient capture of carbon emissions from coal fired power generation and other large industrial emitters at Carbon Capture Status & Outlook 2008

Québec, QC / Houston, TX, October 20, 2008 – CO₂ Solution Inc. (“CO₂ Solution”) is pleased to announce that it will be presenting at **Carbon Capture Status & Outlook 2008** as part of the Carbon Capture Technology Showcase on October 22nd at 4:00 pm at the Crown Plaza Downtown hotel in Houston, Texas. Jonathan A. Carley, Business Development Director will present the company’s breakthrough technology for efficient large scale carbon capture.

Carbon Capture Status & Outlook is a leading industry meeting dedicated to the business of carbon capture. The event will include a focus on domestic and international capture pilot projects, emerging technologies, greenhouse gas regulatory trends and perspectives from the financial markets. Additional information on the conference and registration details can be found at <http://www.infocastiinc.com/index.php/conference/capture>

About CO₂ Solution

CO₂ Solution Inc. has developed a proprietary bio-technological platform for the efficient capture of carbon dioxide (CO₂), the most important greenhouse gas (GHG), from power plants and other large stationary sources of emissions. The Company’s technology platform exploits the natural power of a bio-catalyst (enzyme), carbonic anhydrase, which functions within humans and other mammals to manage CO₂ during respiration. CO₂ Solution has successfully adapted the enzyme to function within an industrial environment, and thus has taken advantage of a biomimetic approach to CO₂ capture based on millions of years of evolution. The Company is commercializing its technology for coal fired power generation, the oil sands and other CO₂-intensive industries where a low-cost capture solution is key to meeting climate change legislation in a cost effective manner.
