For Immediate Release

CO₂ Solution to Receive up to \$600,000 for R&D Expenditures

Quebec City, QC, June 8th, 2010 – CO₂ Solution Inc. (“CO₂ Solution” or the “Company”) is pleased to announce that it has received a certification from le Ministère du Développement économique, de l’Innovation et de l’exportation (MDEIE) that the Joint Development Agreement (JDA) between CO₂ Solution and its enzyme collaborator Codexis, Inc., of Redwood City, California, constitutes a partnership contract within the framework of a precompetitive research project. As such, CO₂ Solution will receive additional tax credit payments based on eligible research & development (R&D) expenditures for the period ending January 31, 2011. Through this additional tax credit eligibility, CO₂ Solution will receive up to a total of \$600,000 for the nearly \$3 million being invested in R&D expenditures as part of the joint development with Codexis.

About CO₂ Solution

Based in Quebec City, CO₂ Solution Inc. has developed a proprietary bio-technological platform for the efficient capture of carbon dioxide (CO₂), the most important greenhouse gas (GHG), from power plants and other large stationary sources of emissions. The Company’s technology platform exploits the natural power of a bio-catalyst (enzyme), carbonic anhydrase, which functions within humans and other mammals to manage CO₂ during respiration. CO₂ Solution has successfully adapted the enzyme to function within an industrial environment, and thus has taken advantage of a biomimetic approach to CO₂ capture based on millions of years of evolution. The Company is commercializing its technology for coal fired power generation, the oil sands and other CO₂-intensive industries where a low-cost capture solution is key to meeting climate change legislation in a cost effective manner.

CO₂ Solution’s technology platform is protected by several North American and European patents, including the use of carbonic anhydrase for CO₂ capture and release in a packed column system. News releases and additional information can be found at www.co2solution.com

Forward-looking Statements: Certain statements in this news release may be forward-looking. These statements relate to future events or CO₂ Solution’s future economic performance and reflect the current assumptions and expectations of management. Certain unknown factors may affect the events, economic performance and results of operation described herein. CO₂ Solution undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable law.
