

TSX-V: CST

CO₂ Solutions to Present at Greenhouse Gas Control Technologies Conference

Quebec City, November 14, 2016 – CO₂ Solutions Inc. (TSX-V: CST), the leader in the field of enzyme-enabled carbon capture technology, announces that management will present at the 13th Greenhouse Gas Control Technologies conference (GHGT-13) on November 15, 2016. The conference is being held in Lausanne, Switzerland.

The conference offers CO₂ Solutions the opportunity to present its technology to an international audience of potential partners and customers, as well as policy and governmental decision makers.

The GHGT conference series has established itself as the principal international conference on greenhouse gas (GHG) mitigation technologies, especially related to carbon capture and storage. Mr. Jonathan Carley, CO₂ Solutions' Vice-President of Business Development will present the results of the Corporation's recent demonstration program, as well as plans for commercial implementation of the technology for the low-cost and environmentally friendly (non-amine) capture, utilization and sequestration of carbon emissions. The presentation is made in the context of the recent Paris Agreement and global efforts therein to reduce GHGs to address climate change.

Further information on GHGT-13 can be found at <http://www.ghgt.info/>. Mr. Carley's presentation will be posted on CO₂ Solutions' website.

About CO₂ Solutions Inc.

CO₂ Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO₂ Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO₂ mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO₂ Solutions has built an extensive patent portfolio covering the use of carbonic anhydrase, or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents. Further information can be found at www.co2solutions.com.

CO₂ Solutions Forward-looking Statements

Certain statements in this news release may be forward-looking. These statements relate to future events or CO₂ Solutions' future economic performance and reflect the current assumptions and expectations of management. Certain unknown factors may affect the events, economic performance and results of operation described herein. CO₂ Solutions undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable law.
