www.co2solution.com

Mr. Kelly brings to CO₂ Solution Inc. a vast expertise and knowledge of the petroleum and natural gas industry, in which he has been an active participant for close to 25 years. over 20 years. His experience will be extremely beneficial in the future development of CO₂ Solution.

Mr. Kelly is currently President and COO of Rabaska Inc., a company working towards the construction of a liquefied natural gas (LNG) import terminal in Lévis, Quebec. Prior, Mr. Kelly was President of Intragaz Inc., a company specialized in the development and operation of underground natural gas storage facilities. He also worked as a facilities and drilling engineer for Chevron Canada Resources in Calgary, responsible for several important projects in Alberta.

Mr. Kelly holds a degree in civil engineering from Queen's University and an MBA from Laval University. He has been invited to deliver many presentations in Canada and the United States on future technologies and innovations in natural gas storage and liquefied natural gas.

"Mr. Kelly brings to CO₂ Solution Inc. his tremendous expertise in the energy industry.. Having such an experienced person who worked in fields related to our activities on the board is a great asset for us." commented Mr. Réjean Blais, Chairman of the Board of Directors.

As a member of the board, Mr. Kelly has been granted 10 000 stock options to purchase CO₂ Solution common shares that can be exercised at a price of 0,180\$ over a period of five years.

About CO₂ Solution

Headquartered in Quebec City, CO₂ Solution's mission is to become the leader in the design, development, production and marketing of products and services directed at the management and neutralization of carbon dioxide and other greenhouse gases. CO₂ Solution, which follows the principles of sustainable development, has developed an innovative enzyme-based technological platform that operates by biologically capturing and transforming CO₂ into an environmentally safe substance. CO₂ Solution's enzyme-based technology platform is an important contribution to global efforts to fight climate change.
