CO₂ Solution Launches New Web Site

New Site Provides Improved Technical and Corporate Information for Partners and Investors

Quebec City, August 19th, 2008 – CO₂ Solution Inc. (“CO₂ Solution”) is pleased to announce that it has launched its new corporate web site at www.co2solution.com. The site will provide partners, investors and other stakeholders with concise, updated information on the benefits of its enzyme based CO₂ capture technology, as well as key business, financial and industry related details.

Commenting on the launch of the new web site, Annie Chiasson, Director, Corporate Affairs stated, “The content and format of the web site has been updated to better reflect the full breadth of our activities and commercial benefits of our technology, and will provide a valuable tool in our business development and investor relations efforts. We look forward to utilizing the site for communicating corporate and commercial developments as they occur.”

About CO₂ Solution

CO₂ Solution Inc. has developed a proprietary bio-technological platform for the efficient capture of carbon dioxide (CO₂), the most important greenhouse gas (GHG), from power plants and other large stationary sources of emissions. The Company’s technology platform exploits the natural power of a bio-catalyst (enzyme), carbonic anhydrase, which functions within humans and other mammals to manage CO₂ during respiration. CO₂ Solution has successfully adapted the enzyme to function within an industrial environment, and thus has taken advantage of a biomimetic approach to CO₂ capture based on millions of years of evolution. The Company is commercializing its technology for coal fired power generation, the oil sands and other CO₂-intensive industries where a low-cost capture solution is key to meeting climate change legislation in a cost effective manner. Additional information is available at www.co2solution.com
