CO₂ Solution to Exhibit at Financial Forum

CO₂ Solution will exhibit to investors at Financial Forum at the Metro Toronto Convention Centre, Toronto, Ontario, January 15-17, 2009

Quebec / Toronto, January 13, 2008 – CO₂ Solution Inc. (“CO₂ Solution”) is pleased to announce that it will be exhibiting at Financial Forum 2009, on January 15, 16 and 17 between the hours of 10:00am and 6:00pm at the Metro Toronto Convention Centre (Exhibit Hall C, North Building) in Toronto, Ontario. CO₂ Solution invites investors and other interested parties to visit its booth, # 501, to learn more about the Company’s technology and recent developments, and to speak with management. CO₂ Solution is pleased to offer complimentary admission to those planning to visit its booth by visiting: <http://www.financialforum.ca/eticket.html?eticket=CSLNX>.

The Financial Forum & Wealth Management Expo is one of Canada's premier financial events where investors, advisors and exhibitors meet to exchange ideas, and benefit from a robust program of financial education, expert advice and timely information. The Expo also features The Stock Pavilion, a special section of the show that features exhibits by leading publicly traded companies. The Pavilion provides a unique opportunity for investors to engage exhibiting companies about their recent developments, results and future strategic direction. For additional information on the conference, please visit: www.financialforum.ca.

About CO₂ Solution

CO₂ Solution Inc. has developed a proprietary bio-technological platform for the efficient capture of carbon dioxide (CO₂), the most important greenhouse gas (GHG), from power plants and other large stationary sources of emissions. The Company’s technology platform exploits the natural power of a bio-catalyst (enzyme), carbonic anhydrase, which functions within humans and other mammals to manage CO₂ during respiration. CO₂ Solution has successfully adapted the enzyme to function within an industrial environment, and thus has taken advantage of a biomimetic approach to CO₂ capture based on millions of years of evolution. The Company is commercializing its technology for coal fired power generation, the oil sands and other CO₂-intensive industries where a low-cost capture solution is key to meeting climate change legislation in a cost effective manner. News releases and additional information are available at: www.co2solution.com
