CO₂ Solutions to Participate in Two Major Events

Quebec City, Quebec, March 3, 2015 – CO₂ Solutions Inc. (“the Company”) (TSX-V: CST), a leader in low-cost carbon dioxide (CO₂) capture announced today the Company will make presentations on its commercialization activities at two major events related to carbon capture and the environment.

U.S.–Canada CCS/CCUS Fourth Bilateral National Conference – Innovation in CO₂ Capture: Increasing Performance and Reducing Cost

To be held on March 4 in Birmingham, Alabama, Jonathan Carley, CO₂ Solutions’ Vice-President of Business Development will present at this invitation-only event. Organized by National Resources Canada and the U.S. Department of Energy, the meeting will foster the dialogue on the advancement of technologies for carbon capture for greenhouse gas (GHG) reductions. The United States–Canada Clean Energy Dialogue (CED) was launched by U.S. President Barack Obama and Canadian Prime Minister Stephen Harper to enhance bilateral collaboration on the development of clean energy science and technologies to reduce greenhouse gases and combat climate change.

The event will help showcase Canadian technology, and is yet another example of how Natural Resources Canada is both supporting innovation in Canada and fostering ways to collaborate with the U.S. on clean energy technologies.

Americana 2015

Mr. Carley will also present in Montreal on March 19 at The International Environmental Technology Trade Show and Conference, Americana. The event is recognized as one of the leading multi-sector events of its kind in North America, providing a forum for the exchange of knowledge and practical experience in relation to environmental technologies and policies. Mr. Carley will present CO₂ Solutions’ as part of a panel session on innovative projects contributing to GHG reductions, organized by Alberta’s Climate Change and Emissions Management Corporation (CCEMC). The panel will discuss the pathways to commercialization and highlights CCEMC’s leadership in funding the development of technologies that can provide substantial environmental and economic benefits.

CO₂ Solutions’ Perspective

“The themes of these events are a perfect match for our value proposition: reducing the costs of carbon capture for both the commercial reuse of CO₂ and for emissions reductions,” stated Evan Price, President and CEO of CO₂ Solutions. “The very low operating cost of our technology, we believe, creates many opportunities for us. Short-term, we see a number of commercial opportunities in sectors where companies are both emitters and consumers of CO₂. The viability of these applications depends strongly on the price point of CO₂, which is where our technology has the potential of being a game changer. We are honoured to be included in these two events.”

“Longer term, we anticipate that the costs associated with emitting CO₂ will increase to the point where there are strong economic incentives to adopt capture technology. When that moment comes, we are extremely well positioned to capitalize on this opportunity. Events like this conference provide us with the opportunity to discuss technological, economic and political developments in our sector, showcase our offering and broaden our network. Additionally, these events create a platform for business development as the Company moves closer to commercialization.”

About CO₂ Solutions Inc.

CO₂ Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO₂ Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO₂ mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO₂ Solutions has built an extensive patent portfolio covering the use of carbonic anhydrase, or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents. Further information can be found at www.co2solutions.com.

CO₂ Solutions Forward-looking Statements

Certain statements in this news release may be forward-looking. These statements relate to future events or CO₂ Solutions' future economic performance and reflect the current assumptions and expectations of management. Certain unknown factors may affect the events, economic performance and results of operation described herein. CO₂ Solutions undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable law.
