

TSX-V: CST

CO₂ Solutions Presents at Leading Industry Conference

Quebec City, September 8, 2015 – CO₂ Solutions Inc. (TSX-V: CST), the leader in the field of enzyme-enabled carbon capture technology, announced that it will give a presentation at today's plenary session of the IEA Greenhouse Gas R&D Programme's (IEAGHG) 3rd Post Combustion Capture Conference (PCCC), in Regina, Saskatchewan.

Mr. Jonathan Carley, CO₂ Solutions' Vice-President of Business Development will present the results to date of the Corporation's demonstration project at Salaberry-de-Valleyfield ("Valleyfield"), Québec, as announced on September 2, 2015.

The IEAGHG is an international collaborative research programme established in 1991 as an Implementing Agreement under the International Energy Agency (IEA). The PCCC3 is a leading forum to discuss the various issues related to the status and development of post-combustion CO₂ capture technologies. Special attention is given to results from challenges and future plans related to CO₂ capture pilots and large-scale demonstration projects. Further information on the PCCC can be found at <http://tinyurl.com/pobektm>.

"It is important that we take every opportunity to present our unique technology to industry experts," said Mr. Carley. "The PCCC provides such a platform, and we will be able to present our progress towards commercialization to a number of potential customers and strategic partners. The results, as announced on September 2, 2015, highlight the unique benefits of our technology and further confirm our sector leadership, helping us in pursuing commercial and partnership opportunities."

About CO₂ Solutions Inc.

CO₂ Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO₂ Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO₂ mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO₂ Solutions has built an extensive patent portfolio covering the use of carbonic anhydrase, or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents. Further information can be found at www.co2solutions.com.

CO₂ Solutions Forward-looking Statements

Certain statements in this news release may be forward-looking. These statements relate to future events or CO₂ Solutions' future economic performance and reflect the current assumptions and expectations of management. Certain unknown factors may affect the events, economic performance and results of operation described herein. CO₂ Solutions undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable law.
