

TSX-V: CST

CO₂ Solutions Presents at Major U.S. Industry Conference

Quebec City, November 18, 2015 – CO₂ Solutions Inc. (TSX-V: CST), the leader in the field of enzyme-enabled carbon capture technology, today announced that it will give a presentation at The 2015 Carbon Management Technology Conference (CMTC 2015), in Sugar Land, Texas on November 19, 2015.

Mr. Jonathan Carley, CO₂ Solutions' Vice-President of Business Development will present the initial results of the Corporation's demonstration project at Salaberry-de-Valleyfield ("Valleyfield"), Québec, as announced on November 10, 2015.

CMTC 2015 focuses on carbon capture, utilization, and storage (CCUS) technologies that provide options for lowering greenhouse gas emissions while maintaining fuel diversity for sustainable growth. The conference is unique in its focus on industry and sustainable/economical CCUS options that have already been deployed at scale. Further information can be found at <http://fscarbonmanagement.org/cmtc/2015>.

"The conference's theme of sustainable and economical carbon capture technologies is a complete match with our value proposition," stated Mr. Carley. "During the running of and following the successful completion of our demonstration project, we have seen a marked increase in interest in the commercial application of our technology for CO₂ reuse and carbon mitigation. This conference helps us to build on this momentum by communicating the benefits of our low cost and environmentally friendly technology to an audience of power generators, Enhanced Oil Recovery producers, government representatives, engineering companies, and others involved in carbon capture projects who are potential partners and customers for CO₂ Solutions".

Mr. Carley's presentation will be available on CO₂ Solutions' website at <http://bit.ly/1CdppHv> as of November 20, 2015.

About CO₂ Solutions Inc.

CO₂ Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO₂ Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO₂ mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO₂ Solutions has built an extensive patent portfolio covering the use of carbonic anhydrase, or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents. Further information can be found at www.co2solutions.com.

CO₂ Solutions Forward-looking Statements

Certain statements in this news release may be forward-looking. These statements relate to future events or CO₂ Solutions' future economic performance and reflect the current assumptions and expectations of management. Certain unknown factors may affect the events, economic performance and results of operation described herein. CO₂ Solutions undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable law.
